LURE XIII – MINION COOL PLAY TOURNAMENT REPORT

"During the Third Age (LURE XIII), *Sauron the Dark Lord returned and threatened to enslave all of Middle-earth. However, having been defeated and almost destroyed in the Second Age* (LURE IX), *Sauron hesitated - he wanted to restore himself to full power before starting his final assault on the Free Peoples ... In the Minion Cool Play Challenge Deck Tournament at Lure XIII, the Witch-king of Argentina was the first Ringwraith to succeed."*

Anno 2009 the Minions in the **Cool Play Tournament** were all defeated by the Free Peoples of Middle-earth. Four years they did hide in the darkness until they returned to the **Lure of MECCG**. They came with new evil weapons from the **Virtual Card Sets**.

A real minions does drink **„Schergenbräu"** the One Beer to rule them all and of course it's for free.
Friday at 19:30 o' clock the Nazgûl did gather in the dungeons of the castle *Stahleck* for the ultimative challenge. They got to achieve special scenarios and cool play turns in order to satisfy the dark lord himself. A real minion does not need rules for that. So there were no fixed rules for the tournament format. After the first round Akhôrahil (HOLGER) asked if we may use the *Dream Cards* rule **„discard a copy of your avatar from hand to untap your avatar in play"**. The other Nazgûl did agree and we used that rule for the other rounds.

A real minion needs energy and of course they do drink the One Energydrink to rule them all **„Schergensuff"**.
